

## ACCR Clio Cup pwrđ by ESET (Technical bulletin 01-2022, 20.06.2022)

*The current Sporting Bulletin is with immediate application, and valid until further notice (modifications in **bolt**)*

### 2.5.2 Race weight

The minimum race weight including the driver and his/her equipment (race overall, balaclava, gloves, helmet with HANS) must not be lower than

- 1.170 kg for the Clio R.S. IV Cup
- 1.110 kg for the Clio R.S. V Cup

It refers to the weight of the vehicle including remaining fuel as after qualifying and races.

**The minimum racing weight of the Clio Cup IV car with remaining fuel and other fluids after qualification and races is 1190 kg.**

### 2.5.3 Ballast

Should the vehicle achieve the minimum weight only with ballast, it must be declared to and sealed by the scrutineers of the Clio Cup Bohemia Organization as well as under the condition that it has to be attached to the intended place and that it only can be removed using a tool.

It is recommended to use the weight plates supplied by Renault Sport with the following part numbers:

- 1 Kg: 77 11 160 299
- 2 Kg: 77 11 160 300
- 5 Kg: 77 11 160 301

**Ballast for reaching of minimum weight needs to be mounted to the genuine passenger seat fixing points with dedicated bolts. It must be possible to apply seals by drilled holes in two of four screws, which secure ballast.**
